* Explanation regarding appropriate use of the earnings forecast and other special notes

Descriptions about the future such as performance forecasts contained in this document are based on information currently available to the Company and certain presumptions considered to be reasonable, and therefore actual business performance and other elements may differ substantially due to various factors. For preconditions for performance forecasts and precaution statements in using such forecasts, please see the appendix, page 3, "1. Qualitative Information regarding the Current Quarter: (3) Descriptions regarding future prospects such as consolidated performance forecasts".

^{*} These quarterly financial results are not the subject of a quarterly review procedure.

1. Qualitative Information regarding the Current Quarter

(1) Descriptions regarding operating results

During the current third quarter consolidated cumulative period (Jun. 1, 2016 – Feb. 28, 2017), Japanese economy has shown gradual upswing, in conjunction with improved environment for employment/earning and effects of various governmental policies. However, there are so many uncertain elements in the arena of overseas politics and financial/capital markets including so-called "Brexit", implying unknown consequences in the future.

Amid such environment, the Group has endeavored to offer excellent articles including mainly high-priced art objects to auctions as part of its main business of auction related business, and to recommend art collectors comprising mainly of wealthy class that they should participate in auctions. In addition, the Group concentrated its efforts in its energy related business to sales of low-pressure type photovoltaic installations, while preparing for full-blown operation of medical tourism as part of the business category of supporting medical institutions, so that the Group could build up its structure to ensure stable profitability at an early stage.

The operating results for each business segment are as follows.

(1) Auction related business

In the current third quarter consolidated cumulative period, handling volume was 1,882,284,000 yen (down 27.5% YoY), net sales was 551,580,000 yen (down 19.6% YoY), and segment loss was 154,337,000 yen (40,035,000 yen in the corresponding period of previous year).

The operating results for each business category are as follows.

		3Q FY05/2017 (consolidated cumulative period) June 1, 2016 - February 28, 2017							
Category	Volume (thousand yen)	YoY (%)	Net sales (thousand yen)	YoY (%)	Auction(s) held	Items offered	Successful bids	Sell through rate (%)

Others	71,346	18.2	56,774	30.4					
Other auction related business - total	218,554	△5.7	179,736	△0.0					
Auction related business - total	1,882,284	△27.5	551,580	△19.6					

(Note) 1. One of major factors causing divergence with respect to YoY ratios of handling volume and of net sales is increase/decrease in merchandise sales. Merchandise sales constitute the Group's net sales, like commission income on successful auction bid price, income from catalog sales and annual membership fee do, and therefore if an article is sold from our stock, its sales price (successful bid price in case of being sold by auction) shall be allocated to net sales, as merchandise sales.

^{2.} As part of the structure of auction-related business, many of auctions would be held during second and fourth quarter periods each year, and therefore there appear some seasonal fluctuations in performance for each quarter consolidated cumulative fiscal period.

i) Auction business

During the current third quarter consolidated cumulative period, the Company held Modern Art Auctions, Modern Art Part II Auctions and Bags/Jewellery & Watches Auctions four times respectively; Modern Ceramics Auctions three times; Wine Auctions twice; as well as Western Art Auction and Post-War & Contemporary Art Auction once respectively; so nineteen occasions in total.

During the corresponding period of previous year, number of Modern Ceramics Auctions (including antique art) held was higher by one, and one special auction was also held, meaning 21 occasions in total. Fewer auctions in the current period resulted in decreased overall handling volume as compared to the previous year. In addition, during the current third quarter consolidated cumulative period, average successful bid value largely slowed down as compared to the previous year and our core business of Modern Art Auction could not eventually cover such slowdown in the achievements of auctions held in July, 2016.

In terms of other auctions, Post-War & Contemporary Art Auction held in October, 2016, resulted in much lower achievement as compared to the previous year, affected by the slump in overseas auction markets.

ii) Other auction related business

Private Sale department put continuous efforts to deal actively during the current third quarter consolidated cumulative period. Elsewhere, services for purchasing precious metals were also carried out actively, which unfortunately resulted in slight decrease in both handling volume and net sales as compared to the previous year.

② Energy related business

With respect to sales of low-pressure type photovoltaic power generation installations of 50 kW class, demands aiming at making use of the taxation system for promoting investment on productivity improvement equipment are still robust, resulting in 72 of those sold during the current third quarter consolidated cumulative period (60 sold during the previous second quarter consolidated cumulative period). In addition, Chichibu-Oonohara Photovoltaic Station (2 MW) owned by the Group started its operation in October, which, together with other electric power selling business by using its own photovoltaic installations, contributed to the Group's performance, leading to net sales of 1,651,434,000 yen (decrease by 6.6% YoY) and segment income of 87,669,000 yen (decrease by 50.1% YoY) in the current third quarter consolidated cumulative period.

It should be noted that, during the previous second quarter consolidated cumulative period, Hokita Photovoltaic Station was sold, so there are considerable differences in composition of sales and in profit rate between the current period and the previous period. Segment income decreased as compared to the previous year.

③ Others

In the business category of supporting medical institutions, platform with functionality for settlement with UnionPay cards has been in operation in Hong Kong for inbound tourists from China and other Asian countries so that it could be a profitability pillar of our medical tourism business, as well as putting our efforts into promoting subscriptions to the platform by affiliated medical institutions and clinics in Japan. In addition, business of selling supplement foods also started.

In such context, performance of the current third quarter consolidated cumulative period was as follows: net sales of 2,207,153,000 yen (decrease by 10.2% YoY), operating loss of 67,712,000 yen (as opposed to operating income of 134,350,000 yen in the previous year), ordinary loss of 112,760,000 yen (as opposed to ordinary income of 115,575,000 yen in the previous year), and quarterly net loss attributable to owners of parent of 100,808,000 yen (as opposed to net income attributable to owners of parent of 33,687,000 yen in the previous year).

(2) Descriptions regarding financial position
